

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph beginning at page 4, line 3 as follows:

According to the vehicular audio system 100 having such dual media function, the dual mode can be set in response to the predetermined operation of the front operation unit 102. In this ~~duet~~dual mode, the sound signals from the different play-back sources can be provided through the speaker 104 and the headphone 105. Therefore, the front and rear passengers can listen to the sound signals from the different play-back sources.

Please amend the paragraph beginning at page 4, line 3 as follows:

If it is decided at Step S-S22 that the broadcasting band of the designated Pch is not identical to that of the front side, the control unit 41 inhibits the selection of the broadcasting band of the designated Pch. Then, the control unit 41 executes the Pch skipping action (at Step S24) so as to designate the next Pch on the basis of the Pch selecting order, and transfers to Step S22 so as to judge whether or not the broadcasting band of the Pch designated by that Pch skip action is identical to that of the front side.
